

# Get Reliable and Risk-Free Outsourcing Results Using These Services from Accelerance

**Accelerance** offers a full range of consulting services and management tools that removes the risk and delivers on the promise of outsourcing – decreased expenses and accelerated software product development.

**Vision Decision**<sup>SM</sup> – Take the emotion and politics out of your in-house versus outsourced software development decision. Vision Decision evaluates your specific criteria and project requirements enabling you to make an objective outsourcing decision, quickly and with confidence.

Accelerance completes a comprehensive decision matrix to determine which areas of product development are candidates for outsourcing. The results show you the benefits and risks of various outsourcing decisions including in-house, onshore and offshore options, using contracting, BOT and subsidiary business relationships.

**Vision Resources**<sup>SM</sup> – After deciding that outsourcing is the right choice for developing your software, the next step is to select the most appropriate resources (onshore or offshore). Vision Resources uses over a dozen criteria to help you find the team with the most appropriate technical and business experience for developing your software product. In most cases, the selection takes just a few days.

You also have the option to select your outsourcing team from members of the exclusive Accelerance Affiliate Program (AAP). The AAP includes only the highest quality, pre-screened development teams from around the world, each with a strong track record of success with US clients.

**Vision Success**<sup>SM</sup> – Accelerance provides the software design and project management necessary to ensure your product is developed on-time and on-budget using an outsourced team. Vision Success is adapted to your software development methodology and creates the proper collaborative environment with clearly defined milestones, frequent builds and constant communication to give you complete visibility into your outsourced development process.

Accelerance Vision Success gives you a process that delivers reliable results when outsourcing your software development, whether you use outsourcing to augment your internal team or outsource the development of your entire software product.

**Vision Perfect**<sup>SM</sup> – Product QA and testing is essential for the success of your commercial software product. Outsourcing is an ideal way to handle this often neglected but critical function. The Vision Perfect service augments or becomes your expert QA team and is fully integrated with your software development process.

Vision Perfect provides you the optimal strategies and tactics required for the manual and automated testing your product needs. Use Vision Perfect and create a good impression with your customers by finding and fixing bugs before you release your product.

**Risk-Proof Your Global Outsourcing with Accelerance**
