

Overview

Softaria Ltd. has been providing custom software development services since 2002, primarily to German and Swiss companies.

Softaria specializes in 3 areas:

- Search technologies and data mining
- Eclipse-related development
- Enterprise web applications

Enterprise web applications

Our most extensive expertise is in the area of complex business applications with web interface. Our solutions are based on Java technologies such as Spring, Hibernate, Wicket, GWT, etc.

Selected Projects:

- Bonds management system (Credit Suisse)
- Non Traditional Investment Products management system (Credit Suisse)
- External Structured Investment Products management system (Credit Suisse)
- Bulletin Board for WAP portal (MTS www.mts.ru via Next Media Interactive)
- Remote education system (SSGA www.ssga.ru)
- Corporate document storage system (Brox GmbH www.brox.de)
- XING prototype (Open BC club www.xing.com)
- Web monitoring system (Henkel AG)
- Telekom Training B2B marketing support system (Deutsche Telekom AG)

Detailed information on each project is available upon request.

Search technologies and data mining

Starting from 2005 Softaria has completed a set of complex search and data mining projects for major European corporations.

As a contractor of Brox GmbH, Softaria participated () in the SeMantic Logistic Information Architecture (SMILA) project, hosted by the Eclipse Foundation and aiming to set an industry standard for the distributed search and unstructured data transformation. (For more information, please look at <http://www.eclipse.org/smila>)

Projects

eccenca (Brox GmbH) – commercial complementary software for Eclipse SMILA.

Anyfinder Desktop Search (Infineon Technologies, formerly Siemens) – corporate desktop search application.

Anyfinder Data Management Center (Brox GmbH) – database duplicate data removal software

theSearch (eVantage GmbH) – corporate search based on Solr (<http://lucene.apache.org/solr/>)

Eclipse-related development

During the development of SMILA and eccenca projects, we have become familiar with the Eclipse RCP (+RAP) and OSGi (Eclipse Equinox) technologies. Now we may offer Eclipse-based solutions.

Technical expertise

Java development

- Spring, OSGi
- Hibernate, iBatis
- Swing, SWT, Wicket, GWT
- Lucene, SOLR
- Tomcat, Resin, Jetty
- Maven 2, Ant
- Continuum, Bamboo
- and a lot of other buzzwords☺.

.NET C# development

Desktop applications, Sharepoint extensions

Databases

Postgre, MySQL, MS-SQL, Oracle (casually)

Schema design, writing stored procedures, performance tuning

J2me development

We have experience writing client software for mobile phones using XML-over HTTP technique to interact with the Java server.

Ubuntu Linux related development

Softaria was the official partner of Canonical in 2007-2008 and is familiar with Ubuntu and Ubuntu-based solutions.

IBM Lotus Domino/Notes development

Softaria had developed a set of business automation products with Lotus Notes, which is Currently on hold, but we still have Lotus Certified Specialists on board.

Intellectual property

- Set of Lotus/Domino based products for business automation (in Russian)
- Remote education system (50% ownership)
- GWT based platform for building business applications with rich web interface

More information is available upon request.
